Understanding the AP Biology Exam Structure

The AP Biology exam is structured to assess students' knowledge and skills in biological sciences. It consists of two main sections: multiple-choice questions and free-response questions. The multiple-choice section comprises 60 questions, while the free-response section includes 2 long-form and 6 short-form questions. This format allows students to demonstrate not only their recall of factual information but also their ability to apply concepts in a practical context.

Format and Timing

The exam is typically 3 hours long, divided into two parts. The multiple-choice section is allotted 90 minutes, and the free-response section has a 90-minute time frame as well. Students must manage their time effectively to ensure they can complete all questions within the given limits.

Weight of Each Section
