Types of Business Entities

The most common types of business entities in Massachusetts include:

- **Corporations:** These are legal entities that are separate from their owners, offering limited liability protection. Corporations can be further classified into C-Corporations and S-Corporations based on tax treatment.

- **Limited Liability Companies (LLCs):** An LLC combines the liability protection of a corporation with the tax benefits of a partnership. This structure is popular among small business owners.
- **Sole Proprietorships:** This is the simplest form of business, where an individual owns and operates the business. However, it does not provide liability protection.
- **Partnerships:** In a partnership, two or more individuals share ownership and management responsibilities. Partnerships can be general or limited, depending on the liability of the partners.

Each of these entities has specific advantages and disadvantages, making it essential for business owners to choose the right structure for their needs.
