Curriculum Overview

The curriculum of a master of business administration in healthcare administration is designed to provide a comprehensive understanding of both business principles and healthcare systems. This interdisciplinary approach ensures that graduates are well-prepared to handle the unique challenges faced in healthcare settings. Core courses typically include subjects such as healthcare policy, financial management in healthcare, healthcare operations management, and strategic planning.

Core Courses

Students will engage in a variety of essential courses, each focusing on different aspects of healthcare management. Common core courses include:

- **Healthcare Systems and Policy:** This course covers the structure and function of healthcare systems, including the impact of policy on healthcare delivery.
- **Healthcare Financial Management:** Students learn about financial principles, budgeting, and economic analysis as they pertain to healthcare organizations.
- **Leadership in Healthcare:** This course emphasizes leadership theories and practices within healthcare settings, preparing students to lead diverse teams effectively.
- **Healthcare Operations Management:** Focuses on the efficient delivery of healthcare services, including quality improvement and operational efficiency.
- **Strategic Management in Healthcare:** This course teaches students to develop and implement strategies that enhance organizational effectiveness.
