Program Structure

The BSc Economics program at LSE is designed to provide students with a strong foundation in economic theory, quantitative methods, and applied economics. The curriculum is structured to ensure that students gain both theoretical knowledge and practical skills.

Core Modules

In the first year, students are introduced to core modules that cover essential topics in economics. These modules typically include:

- Microeconomics
- Macroeconomics
- Mathematics for Economists
- Statistics

These foundational courses are crucial for developing a comprehensive understanding of economic principles.

Specialized Modules

In subsequent years, students can choose from a variety of specialized modules that allow them to tailor their education to their interests. Options may include:

- Development Economics
- Environmental Economics
- International Economics
- Industrial Organization

These specialized courses enable students to delve deeper into specific areas of economics and apply their knowledge to real-world issues.

Dissertation and Research Projects

In the final year, students are required to undertake a dissertation or a research project. This component allows students to engage in independent research, honing their analytical and writing skills. It also provides an opportunity to explore a topic of personal interest in depth.
