Program Structure and Curriculum

The CCNY economics program is designed to provide students with a comprehensive understanding of economic theory and practice. The curriculum encompasses a wide array of subjects, enabling students to explore various facets of economics. Core courses often include microeconomics, macroeconomics, econometrics, and international economics, which are essential for developing a solid foundation in the field.

Core Courses

Students in the economics program will typically engage with the following core courses:

- **Microeconomics:** This course examines individual and firm behavior in decision-making and resource allocation.
- **Macroeconomics:** Students learn about the economy as a whole, including inflation, unemployment, and fiscal policy.
- **Econometrics:** This course focuses on statistical methods and their application in economic data analysis.
- **International Economics:** Students explore trade theory, exchange rates, and the global economy.

In addition to core courses, students have the opportunity to select electives that align with their interests, such as behavioral economics, public finance, and development economics. This flexibility

allows students to tailor their education to meet their career aspirations.

Capstone Projects

As part of their academic journey, students may also participate in capstone projects that require them to apply theoretical concepts to real-world issues. These projects often involve extensive research and analysis, giving students practical experience that enhances their resumes.

Faculty and Research Opportunities

The Economics Department at CCNY boasts a diverse faculty with expertise in various fields of economics, including labor economics, environmental economics, and economic policy analysis. Faculty members are not only educators but also active researchers who contribute significantly to the body of economic literature.

Research Initiatives

Students are encouraged to engage in research initiatives alongside faculty members. These opportunities allow students to gain hands-on experience in economic research methodologies and contribute to ongoing projects. Areas of research often include:

- **Labor Market Trends:** Investigating employment patterns and wage disparities.
- **Environmental Economics:** Analyzing the economic impacts of environmental policies and sustainability efforts.

- **Public Policy:** Evaluating the effectiveness of government policies on economic outcomes.

Participating in research not only enhances students' understanding of economics but also prepares them for future academic or professional pursuits in the field.

Career Paths for Economics Graduates

Graduates of the CCNY economics program are well-equipped to pursue a variety of career paths. The analytical and quantitative skills developed during the program are highly valued in numerous sectors. Common career trajectories for economics graduates include:

Job Opportunities

Economics graduates can find employment in various industries, including:

- **Government Agencies:** Many graduates work for federal, state, or local governments, analyzing economic data and advising on policy.
- **Financial Services:** Roles in banking, investment firms, and insurance companies are common, as graduates apply their knowledge of economic principles to financial decision-making.
- **Research Organizations:** Graduates often work in think tanks or research institutes, conducting economic analysis and contributing to policy recommendations.
- **Nonprofit Organizations:** Many economics graduates choose to work in nonprofits, focusing on

economic development and social policy.

Additionally, some graduates opt to pursue further education, such as master's or doctoral degrees in economics or related fields, which can open doors to advanced career opportunities in academia or specialized research roles.

The Importance of Economics in Society

Understanding economics is crucial in today's interconnected world. The principles of economics help explain how resources are allocated, how markets function, and how policies affect individuals and communities. Economics provides analytical tools that are essential for addressing pressing social issues such as poverty, inequality, and climate change.
