Curriculum Overview

The curriculum of the economics degree at Cambridge is designed to provide students with a robust understanding of economic theories and practical applications. The program typically spans three years for an undergraduate degree and includes a comprehensive blend of core and elective courses.

Core Modules

Students in the economics program will encounter a variety of core modules that form the foundation of their education. These include:

- Microeconomics: Understanding individual and business decision-making.

- **Macroeconomics:** Exploring the economy as a whole, including inflation, unemployment, and economic growth.
- **Econometrics:** Applying statistical methods to economic data to test hypotheses and forecast future trends.
- **Development Economics:** Investigating economic issues in developing countries and strategies for improvement.
- **International Economics:** Examining trade theories and the impact of globalization on economies.

These core modules lay the groundwork for advanced study in economics and are complemented by elective courses that allow students to tailor their education to their interests and career goals.

Elective Courses

Elective courses provide students the opportunity to specialize in areas such as:

- **Behavioral Economics:** Studying the psychological factors that influence economic decision-making.
- **Financial Economics:** Exploring the interplay between financial markets and economic theory.
- **Public Economics:** Analyzing government policies and their impact on economic efficiency and equity.
- **Environmental Economics:** Understanding the economic aspects of environmental issues and resource management.

By selecting from various electives, students can align their studies with their future aspirations, whether in finance, policy-making, or research.

Admission Requirements

Gaining admission to the economics program at Cambridge is highly competitive. Prospective students must meet specific academic requirements and demonstrate their potential for success in the program.

Academic Qualifications

Applicants are typically required to have excellent A-level results or equivalent qualifications, with a strong emphasis on mathematics. The following subjects are generally recommended:

- Mathematics
- Economics (if available)
- Further Mathematics (optional but beneficial)

Besides academic qualifications, Cambridge also assesses candidates based on their personal statements and references, which should reflect their passion for economics and analytical skills.

Interviews and Assessments

Shortlisted candidates may be invited for an interview, which is a crucial part of the selection process. During the interview, applicants are expected to demonstrate their critical thinking and problem-solving abilities, often involving discussions about economic concepts and current events.
