Overview of the Economics Degree Plan

The economics degree plan at the University of Texas is designed to provide students with a comprehensive understanding of economic principles, statistical methods, and critical thinking skills. This program is offered through the College of Liberal Arts and prepares students for various careers in business, government, and non-profit sectors. The degree emphasizes both theoretical foundations and practical applications, ensuring that graduates are well-equipped to analyze and interpret economic data.

Students enrolled in the economics program will engage in a curriculum that covers a broad spectrum of topics, including microeconomics, macroeconomics, econometrics, and international economics. The program is structured to allow students to tailor their studies according to their interests, enabling them to specialize in areas that align with their career aspirations.

Core Curriculum Requirements

To obtain an economics degree from UT, students must complete a series of core courses that lay the groundwork for advanced study in economics. The core curriculum is designed to provide a solid foundation in both theoretical and empirical aspects of economics.

Required Core Courses

The core courses required for the economics degree typically include:

- Principles of Microeconomics
- Principles of Macroeconomics
- Intermediate Microeconomic Theory
- Intermediate Macroeconomic Theory
- Econometrics

These courses are essential for understanding fundamental economic concepts and developing quantitative skills. Students will learn how to analyze market behavior, evaluate economic policies, and interpret economic data effectively.

Addition of Mathematics and Statistics

In addition to core economics courses, students are also required to complete mathematics and statistics courses. These courses are crucial for developing the analytical and quantitative skills necessary for success in economics. Typically, students will take:

- Calculus
- Statistics
- Linear Algebra

These subjects are integral for understanding complex economic models and conducting empirical research.

Elective Courses and Specializations

The flexibility of the economics degree plan at UT allows students to select elective courses that align with their individual interests and career goals. This aspect of the program is particularly beneficial for those looking to specialize in specific areas of economics.

Specialization Areas

Students can choose from various elective courses, which may include:

- Labor Economics

- Development Economics
- International Trade
- Public Economics
- Behavioral Economics

These electives allow students to delve deeper into topics that are relevant to current economic issues and trends, enhancing their expertise and employability.

Capstone Projects and Internships

Many students in the economics program are encouraged to participate in capstone projects or internships. These opportunities provide practical experience and allow students to apply their academic knowledge in real-world settings. Such experiences are invaluable for building a professional network and gaining insight into potential career paths.
