Overview of the Economics Major at CSULB

The economics major at California State University, Long Beach is designed to provide students with a comprehensive understanding of economic theories and their real-world applications. The program is part of the College of Business Administration and offers a Bachelor of Arts in Economics. Students will engage with essential concepts such as microeconomics, macroeconomics, and econometrics, which are foundational to the study of economics. The program aims to develop critical thinking, analytical skills, and the ability to interpret quantitative data, all of which are vital in today's data-driven economy.

Moreover, the faculty at CSULB consists of experienced educators and researchers who are committed to student success. They bring a wealth of knowledge and expertise to the classroom, ensuring that students receive a high-quality education. The program emphasizes not only theoretical understanding but also practical skills that can be applied in various

professional settings.

Curriculum and Course Structure

The curriculum of the economics major at CSULB is structured to cover a wide range of topics that provide a solid foundation in economic principles. Students are required to complete core courses as well as elective classes that allow them to tailor their education to their interests.

Core Courses

Core courses are essential for all economics majors and typically include:

- Principles of Microeconomics
- Principles of Macroeconomics
- Intermediate Microeconomic Theory
- Intermediate Macroeconomic Theory
- Econometrics
- Economic History

These courses equip students with a strong understanding of both individual economic behavior and broader economic systems. Econometrics, in particular, provides valuable skills in statistical analysis, which are increasingly important in various industries.

Electives and Specializations

In addition to core courses, students can select from a variety of electives to deepen their knowledge in specific areas. Some popular elective courses include:

- Labor Economics
- Environmental Economics

- International Trade
- Development Economics
- Public Economics

These elective courses allow students to explore specific interests and prepare for careers in specialized fields of economics.
