Overview of the Economics Major at UMD

The economics major at the University of Maryland is designed to provide students with a robust understanding of economic principles and their application in various contexts. This program is housed within the College of Behavioral and Social Sciences and is recognized for its rigorous academic standards and innovative teaching methods. Students in this major are encouraged to develop critical thinking skills, analytical abilities, and a deep understanding of economic systems.

The program offers a balanced approach, blending theoretical foundations with practical applications. Students engage with topics ranging from microeconomics and macroeconomics to specialized areas such as international economics and labor economics. Additionally, the program emphasizes the importance of quantitative methods, preparing students to analyze data effectively and make informed economic decisions.

Curriculum Structure

The curriculum for the economics major at UMD is structured to ensure that students gain a comprehensive understanding of both theoretical and applied economics. The program typically requires the completion of core courses, elective courses, and a capstone project or research experience.

Core Courses

Core courses are foundational classes that all economics majors must complete. These courses cover essential topics and methodologies, including:

- Principles of Microeconomics
- Principles of Macroeconomics

- Intermediate Microeconomic Theory
- Intermediate Macroeconomic Theory
- Econometrics

These core courses lay the groundwork for more advanced studies and allow students to develop a solid understanding of key economic concepts and theories.

Elective Courses

In addition to core courses, students can choose from a variety of elective courses to tailor their education to their interests and career goals. Electives may include topics such as:

- Environmental Economics
- Health Economics
- Development Economics
- Industrial Organization
- Public Finance

These electives provide students with the opportunity to explore specific areas of economics in depth and gain insights into real-world economic issues.

Capstone and Research Experience

A capstone project or research experience is often required to complete the economics major. This component allows students to apply their knowledge to real-world problems, conduct research, and present their findings. Many students choose to work with faculty on research projects, gaining valuable experience that enhances their academic profile.

Research and Internship Opportunities

The economics program at UMD emphasizes the importance of research and practical experience. Students are encouraged to engage in research projects that align with their academic and career aspirations. The university offers various resources to support student research, including access to economic databases, faculty mentorship, and research grants.

Research Opportunities

Research opportunities are abundant at UMD, with many faculty members conducting cutting-edge research in various fields of economics. Students can participate in:

- Undergraduate research assistant positions
- Independent study projects
- Collaborative research with faculty
- Participation in economics conferences

These experiences not only enhance students' understanding of economics but also prepare them for graduate studies or careers in research-oriented fields.

Internship Programs

Internships are a critical component of the economics major at UMD, providing students with invaluable hands-on experience. The university has established partnerships with various organizations, including government agencies, non-profits, and private firms, to facilitate internship placements. Students can benefit from:

- Real-world experience in economic analysis
- Networking opportunities with professionals in the field
- Enhanced employability upon graduation

Internships allow students to apply theoretical knowledge in practical settings, making them more competitive in the job market.
