Program Overview

The Oxford MPhil in Economics is a two-year program that offers a comprehensive understanding of both theoretical and applied economics. The program is structured to provide students with a solid foundation in economic theory while also promoting empirical research skills. This balance is crucial for those looking to engage with real-world economic issues. The curriculum is designed to challenge students intellectually and foster critical thinking, all while being supported by leading academics in the field.

Course Structure

The course is divided into core modules and optional modules, which allow students to tailor their education to their interests. Core modules typically cover essential areas such as microeconomics, macroeconomics, and econometrics, while optional modules may focus on topics like international

economics, development economics, and behavioral economics. This structure ensures that students not only gain a broad understanding of economics but also specialize in areas that align with their career goals.

Research Component

A significant aspect of the MPhil program is the research component, which culminates in a dissertation. This allows students to engage in independent research under the guidance of experienced faculty members. The dissertation not only demonstrates the student's ability to conduct rigorous research but also serves as a valuable addition to their academic portfolio.

Entry Requirements

To be considered for the Oxford MPhil in Economics, applicants must meet specific academic and linguistic requirements. A strong background in economics and mathematics is essential, as the program is quite rigorous. Typically, candidates are expected to have a first-class or upper second-class undergraduate degree, preferably in economics or a related field.

Language Proficiency

For non-native English speakers, proof of English language proficiency is necessary. This can be demonstrated through standardized tests such as the IELTS or TOEFL. Meeting the language requirements is crucial for ensuring that all students can engage fully with the program's content and participate in discussions effectively.

Application Process

The application process involves submitting an online application form, academic transcripts, letters of recommendation, and a personal statement. The personal statement is particularly important as it allows candidates to showcase their motivation for studying economics at Oxford and their future aspirations. Candidates may also be invited for an interview as part of the selection process.

Curriculum Structure

The curriculum of the MPhil in Economics is designed to equip students with a robust understanding of economic principles and their applications. The program typically includes a mix of lectures, tutorials, and seminars. This blend ensures that students benefit from both theoretical insights and practical applications.

Core Modules

- Microeconomic Theory
- Macroeconomic Theory
- Econometrics
- Statistical Methods for Economics

These core modules form the backbone of the program, providing essential skills that students will build upon throughout their studies. Mastery of these subjects is critical for advanced economic analysis and research.

Optional Modules

Students can choose from various optional modules, allowing them to focus on specific areas of interest. Some examples include:

- International Trade and Finance
- Development Economics
