Overview of the Economics Major

The economics major at UIUC aims to provide students with a strong foundation in economic theory, quantitative methods, and analytical skills. The curriculum is designed to be rigorous, integrating both microeconomic and macroeconomic principles, allowing students to understand how economic systems function and how policies affect economic outcomes. The program emphasizes critical thinking and problem-solving, preparing graduates to tackle complex economic issues in various professional settings.

Program Structure

The economics program is structured to include a blend of required courses and elective classes, giving students the freedom to tailor their education according to their interests. Students typically complete their degree in

four years, although the duration may vary based on course load and individual circumstances.

Degree Options

UIUC offers both a Bachelor of Arts (BA) and a Bachelor of Science (BS) in economics. The BA program tends to focus more on the liberal arts and social sciences, while the BS program emphasizes a stronger quantitative approach, incorporating more mathematics and statistics into the curriculum. Students should choose the degree that aligns best with their career aspirations and academic strengths.

Admission Requirements

To be eligible for the economics major at UIUC, students must meet specific admission criteria. These requirements ensure that students are well-prepared for the rigorous coursework involved in the program.

General Admission Criteria

- Completion of high school or equivalent education.
- Minimum GPA requirements as set by UIUC.
- Standardized test scores (ACT or SAT) may be required, although some programs have test-optional policies.
- Prerequisite coursework, including mathematics and social sciences.

Transfer Students

Transfer students wishing to enter the economics major must also meet certain criteria. They are typically required to have completed a minimum number of college-level courses and maintain a specific GPA. It is crucial for transfer students to consult with academic advisors to ensure that their previous coursework aligns with UIUC's requirements.

Core Coursework Requirements

The core coursework for the economics major is designed to provide a comprehensive understanding of economic theory and its applications. Students must complete a series of foundational courses that form the backbone of

their economics education.

Required Courses

- Introduction to Microeconomics
- Introduction to Macroeconomics
- Intermediate Microeconomic Theory
- Intermediate Macroeconomic Theory
- Econometrics or Statistical Methods in Economics

These courses cover essential topics such as consumer behavior, market structures, national income, inflation, and economic modeling. Students will also learn how to analyze data and apply statistical techniques, which are crucial for making informed economic decisions.

Mathematics and Statistics Requirements

Mathematics plays a critical role in the study of economics. Students are required to complete courses in calculus and statistics, which provide the analytical tools necessary for understanding economic theories and conducting empirical research. Specific courses may include:

- Calculus for Business and Social Science
- Statistical Methods

Elective Options

In addition to core courses, students in the economics major have the flexibility to choose electives that align with their interests and career goals. These electives allow students to explore specialized areas within economics, such as labor economics, international trade, or environmental economics.

Types of Electives

- Labor Economics
- Development Economics
- Environmental Economics
