The game features a day-night cycle, where the threats increase during nighttime, thus requiring players to be more strategic about their movements and missions.

Health and Stamina

Players must manage health and stamina effectively. Health can be replenished through medkits and consumables found throughout the game, while stamina is consumed during actions like sprinting and

As players progress, they earn experience points (XP) which contribute to leveling up. Each character has a skill tree that allows for specialization in various combat styles and abilities. Understanding these skill trees will enable players to enhance their gameplay experience by focusing on their preferred combat style, whether it be melee, ranged, or support roles.
