The Origins of Michael Myers

Michael Myers was born on October 19, 1957, in the fictional town of Haddonfield, Illinois. His childhood was marred by violence and trauma, which ultimately shaped his existence as a killer. At the tender age of six, Michael committed his first murder when he brutally killed his sister, Judith Myers. This horrific act was the catalyst for his institutionalization in Smith's Grove Sanitarium, where he spent 15 years under the care of psychiatrist Dr. Sam Loomis.

Dr. Loomis recognized that Michael was not just a troubled child but a manifestation of pure evil. His obsession with Michael led him to believe that the boy could never be rehabilitated, and he warned the world of the danger that Michael posed. This early backstory sets the stage for the relentless horror that follows when Michael escapes from the sanitarium and returns to Haddonfield on Halloween night.
