How to Create a Jeopardy Quiz

Select a subject or theme that aligns with your educational goals. Consider what you want your students to learn and how the quiz can reinforce those concepts.

Step 2: Define Categories

Create categories that encompass various aspects of your chosen topic. Aim for five categories with five questions each to maintain a balanced quiz structure.

Step 3: Write Questions

Craft questions for each category, ensuring they vary in difficulty. Questions should be clear and concise, allowing students to respond effectively. Aim for a mix of easy, medium, and challenging questions to cater to diverse skill levels.

Step 4: Assign Point Values

Assign point values to each question based on difficulty. For example, easier questions could be worth 100 points, while harder ones are worth 500 points. This point system adds a strategic element to the game.

Step 5: Test Your Quiz

Before presenting the quiz to students, run through it to ensure clarity and appropriateness of questions. Testing the quiz will help identify any areas that may need adjustment.
