Understanding Texas Counties: A Brief Overview

Texas, a state renowned for its sheer size and diverse population, is divided into an impressive 254 counties. This extensive number makes it the state with the most counties in the United States. Each Texas county possesses its own unique history, governed by a county judge and a four-member commissioners court. The sheer variety of Texas counties, from the bustling urban centers of Harris County to the vast, sparsely populated expanses of West Texas, reflects the state's incredible geographical and cultural tapestry.
